Two marketing limits

Every marketing payout uses up both limits at once **Example: +$40 marketing**

Income Limit

the limit of your main RWANFTFI NFT

Shared by RWA and FinPro marketing

before	→	limit left
$2 000		$1 960 after **+$40 marketing**

Earn cap

the payout cap of your position in a FinPro product

Filled by passive income and marketing together

before	→	left to the cap
$1 600		$1 560 after **+$40 marketing**

Marketing is paid while **both limits have room**

RWA NFT ™
OWN YOUR FUTURE

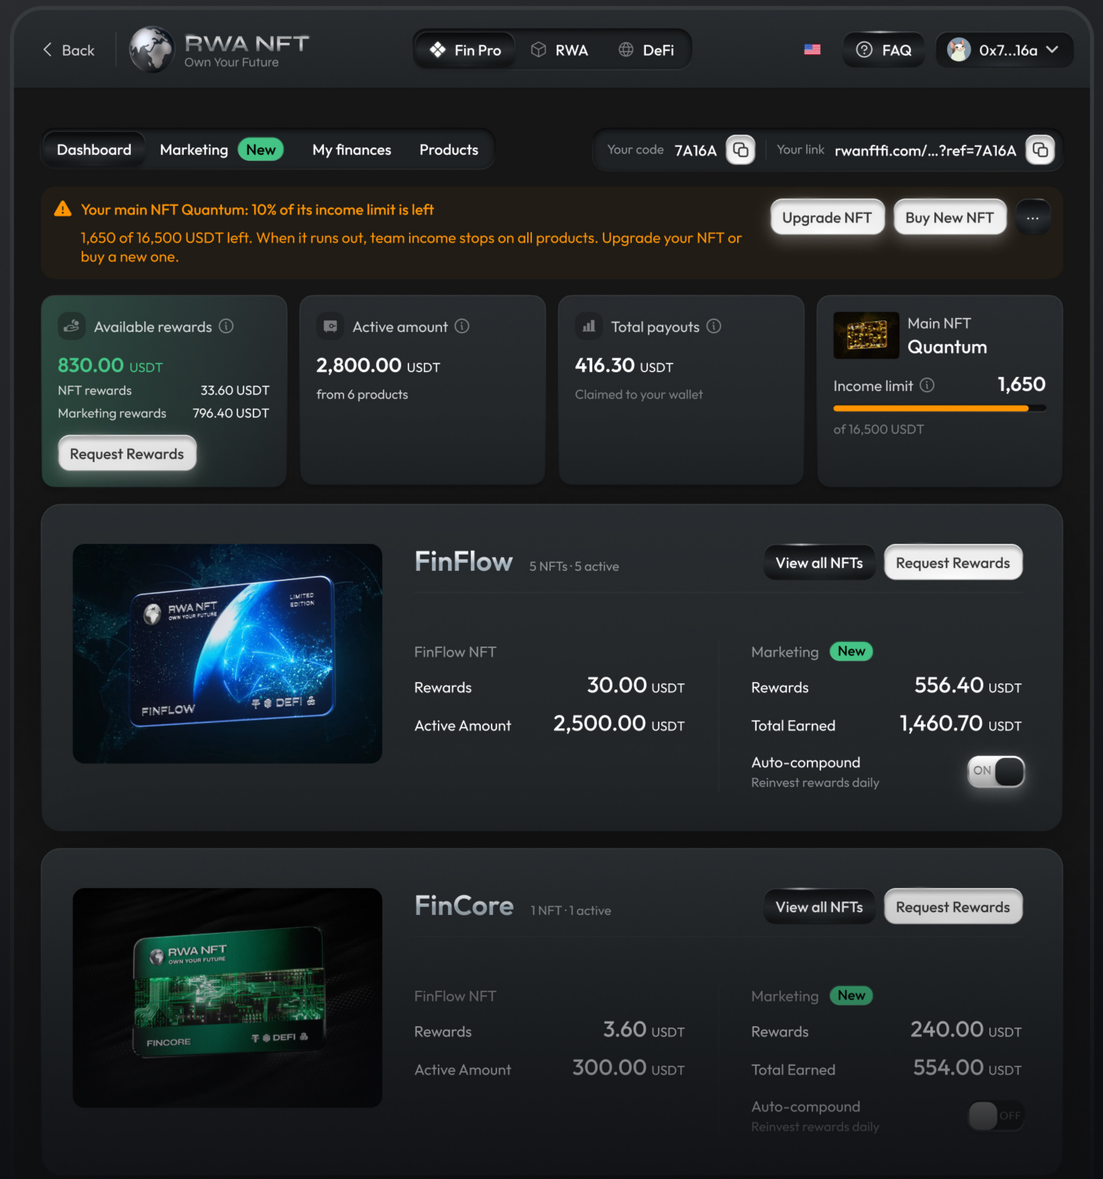

When a limit runs out

NFT limit = 0
marketing pauses until you renew or upgrade the NFT

Earn cap reached
the position is complete

Limit is below the payout
you get the amount that fits the remaining limit

FinPro marketing is paid out of your NFT's limit. This rule is set in the smart contract – before the first payout you **confirm it with a signature in your wallet**

Auto-compound: your marketing keeps earning

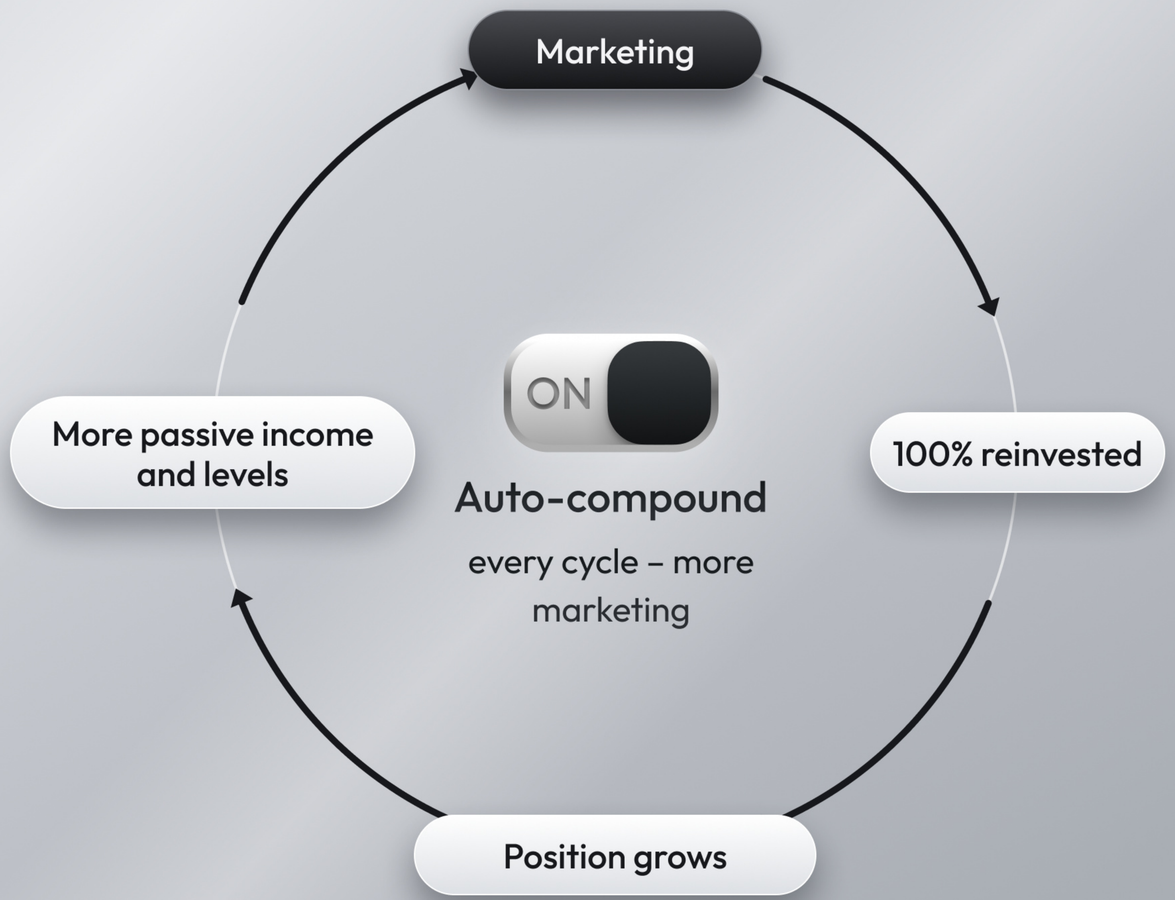

Turn it on in the product – 100% of marketing goes straight into your position

On

Your marketing balance and all new payouts go into the position

Off

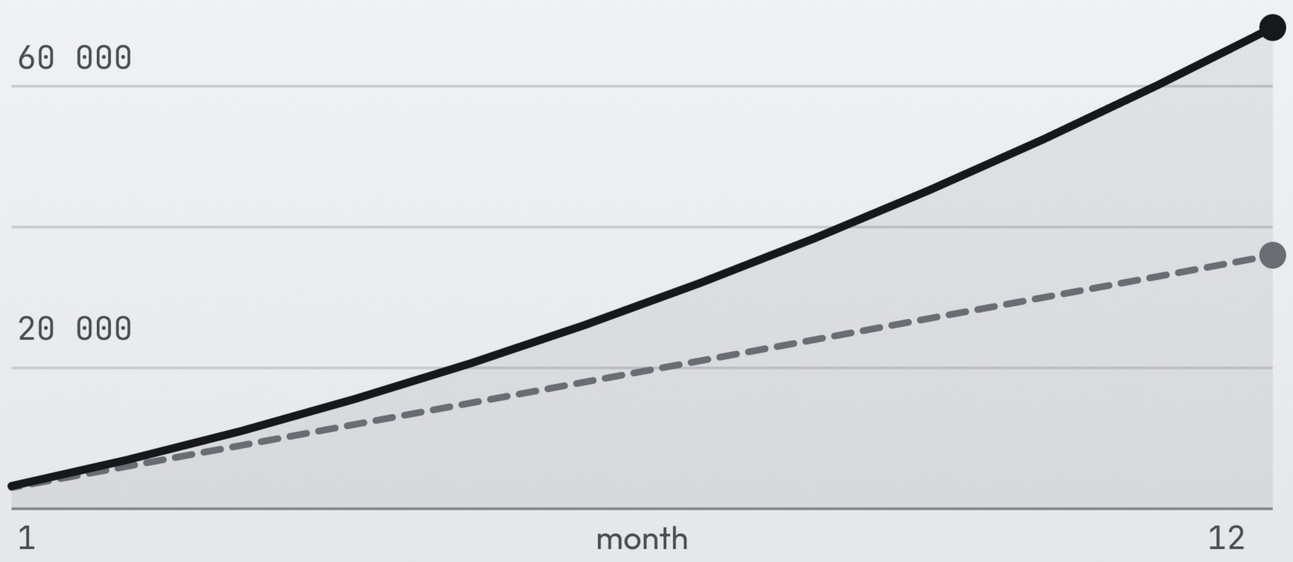

Payouts build up on the balance – withdraw whenever you like

$100 a day: save or reinvest

Example: $100 of marketing a day, product yield 15% a month

BALANCE OVER 12 MONTHS, $

Every $100 goes straight into the position; product income is not reinvested

SAVE

$36,000

on the balance after 12 months

AUTO-COMPOUND ON

≈$68,310

$36,000 of marketing + ≈ $32,310 of product income over 12 months

×1,9 And that's before marketing from the levels your larger deposit unlocks
